

FULL Tank™

A SUPPLEMENT FOR SHOW ANIMALS

SUNGLO FEEDS®

- **FULL Tank** is a nutritional product designed to increase the capacity of the stomach or rumen.
- **FULL Tank** is useful when intake is restricted to limit weight gain.
When limit-feeding, adding FULL Tank maintains "gut fill" and keeps the fresh, expanded look.
- **FULL Tank** reduces the stress level and hard look associated with a low feed intake.
- **FULL Tank** contains a probiotic to aid digestive function.

FULL Tank is pelleted and works best when fed dry.

FULL Tank expands more than beet pulp and will retain more water than beet pulp.

USAGE DIRECTIONS

Mix with complete feeds for animals (cattle, sheep, goats, horses and swine) that are being held or need additional gut fill.

1. Determine the target rate of gain for your animal(s).
2. Choose the feed that will supply the proper nutrition to achieve the target rate of gain.
3. Add **FULL Tank** at the proper level. (listed below)

FULL Tank may be added to all species feeds as a replacement for beet pulp.

NORMAL USAGE:

- ½ - 2 lbs/head/day for pigs, sheep and goats
- 2 - 5 lbs/head/day for cattle
- 1 - 4 lbs/head/day for horses
